# The freight line through Bergslagen. Hallsberg - Degerön, section Stenkumla – Dunsjö

# The Global Project "The freight line through Bergslagen"

# The main objectives of the action are to be able to offer:

- more freight train operating slots
- one passenger train per hour in regional traffic
- good punctuality in both freight and passenger travel
- shorter transport and travel times

# Key success factors

- A mature project.
- A turnkey contract.
- Close collaboration between the project management and the contractor's staff (with a shared office).
- Make the project management's life as easy as possible
- Regularly updated information to people living nearby

**Thank you for listening !**
